STRUT SPRING SEAT SUPPORT

5

ABSTRACT OF THE DISCLOSURE

The present invention provides a strut spring seat support to support a coil spring and attachable to other vehicle suspension system components. The strut spring seat support comprises a spring seat bracket and a lower spring seat. In a preferred embodiment, the spring seat bracket is welded to the reservoir tube and the lower spring seat is positioned around the reservoir tube and projection welded to the spring seat bracket. The spring seat bracket can be attached to the stabilizer bar and the wheel assembly or, in an alternate embodiment, to the stabilizer bar alone
